## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-12, 18 and 19 drawn to a method for surface preparation including removing material from a surface, classified in class 451, subclass 57.
  - II. Claims 13-17, 20 and 21, drawn to a method for applying a ceramic coating, classified in class 204, subclass 164.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and different functions. The claims of Group I are directed to a method for the preparation of a substrate and include the step of removing material from the surface of the substrate at a progressively decreasing rate. The claims of Group II are directed to a method for applying a ceramic thermal barrier coating. The

method recited in the Group II claims includes a step of abrasively removing material from the bond coat at a progressively reducing rate. The preparation step requires that the removing be performed abrasively and is of a scope different than the surface preparation method recited in claim 1. The removing step of claim 13 has a different mode of operation than that of claim 1.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
